CORAL SWIFT

Connecting Global Opportunities with Delivery Excellence

US-Focused Business Positioning | IT & Non-IT Project Solutions | Strategic Partnerships

Technology. Operations. Partnerships. Growth.

A corporate introduction and partnership framework for technology providers, business-process operators, delivery centers and established enterprises seeking cross-border project opportunities.

PROFILE STATUS: Business-development draft. Company registration, geographic operations, partnership relationships and historical project allocations require documentary confirmation before external publication.

01 | Company Overview

Coral Swift is presented as a US-oriented IT and Non-IT project solutions and partnership platform, connecting international project requirements with qualified delivery organizations in India and other markets. The proposed operating model combines project sourcing, vendor qualification, delivery coordination, governance and long-term business partnerships.

Our positioning is built around a straightforward principle: connect capable delivery partners with clearly defined opportunities, measurable execution standards and transparent commercial arrangements.

02 | Vision & Mission

Vision: To build a trusted international ecosystem where qualified technology and operations companies can access scalable project opportunities.

Mission: To enable disciplined project execution across IT and Non-IT domains through partner screening, structured onboarding, operational governance and outcome-based delivery.

03 | Core Service Portfolio

- **IT services:** Enterprise resource planning (ERP), web applications, business portals, custom software, cloud and infrastructure support, application testing, maintenance and digital transformation.

- **Non-IT / business operations:** Medical coding, medical billing, healthcare support processes, data entry, document processing, banking KYC, mortgage processing, mutual-fund operations support and back-office services.

- **Partnership services:** Vendor discovery, capability assessment, staffing alignment, project allocation coordination, reporting, quality assurance and commercial engagement support.

04 | Global-to-Local Delivery Model

International demand → requirement validation → partner due diligence → project scoping and contracting → delivery and QA → reporting and continuous improvement.

Hyderabad is proposed as a key partner and delivery ecosystem. Additional locations and cross-border operations should be listed only after confirmation.

05 | Strategic Partnership & Merger Eligibility

Coral Swift invites discussions with established IT organizations that can demonstrate operational maturity and scalable delivery capacity. The following criteria are proposed screening requirements, not a promise of merger approval or project award.

- **Business age:** At least 3 years of established operations.

• **Workforce:** Minimum 50 employed candidates/personnel, supported by verifiable payroll or statutory records.

• **Direct project allocation:** Minimum annual turnover of INR 2 crore, supported by audited financial statements or equivalent verifiable documentation.

• **Additional assessment:** Delivery history, technical capabilities, compliance, data security, management strength, client references and commercial fit.

06 | Engagement Pathways

• **Strategic merger / integration discussion:** For qualifying organizations seeking a deeper structural relationship, subject to legal, financial and operational due diligence.

• **Direct project engagement:** For financially established partners meeting the INR 2 crore turnover threshold and project-specific qualifications.

• **Vendor / subcontracting partnership:** For companies able to demonstrate relevant domain skills and service-level compliance, subject to separate commercial approval.

07 | Illustrative Project Opportunities

The following are **sample project categories**, not a representation that specific contracts are currently available or have already been awarded.

• **Enterprise ERP implementation:** HRMS, finance, workflow automation, reporting and integrations.

• **Web and application development:** Corporate portals, customer-facing applications, APIs, QA and support.

• **Healthcare operations:** Medical coding, billing and related documentation workflows with client-defined quality controls.

• **Financial process operations:** KYC review, mortgage documentation, mutual-fund data processing and reconciliation.

• **High-volume document operations:** Data entry, XML conversion, indexing, verification and quality control.

08 | Hyderabad Partner Ecosystem

The following organizations were supplied for inclusion as proposed or reported relationship references. **Relationship type, legal names, signed agreements and project-allocation histories are pending verification.** They must not be described as confirmed recipients of Coral Swift projects until supporting records are available.

• OPMW (One Place Multi Work)

- VPD Technologies Private Limited
- Sivion Global Technologies (name supplied as “Sevian”)
- Aapthi / “Aptic” (legal entity to confirm)
- Micro D (legal entity to confirm)
- Medha (legal entity to confirm)
- Alboriss / “Albaris” (legal entity to confirm)

09 | How Project Allocation Is Evaluated

- **1. Expression of interest:** Submit a company profile, service portfolio and preferred engagement model.
- **2. Eligibility verification:** Validate incorporation date, employee count and turnover where applicable.
- **3. Capability review:** Evaluate infrastructure, domain expertise, team structure, references and information security.
- **4. Commercial and legal review:** Agree scope, pricing, confidentiality, intellectual property, responsibilities and payment terms.
- **5. Pilot / onboarding:** Complete a controlled kickoff with delivery milestones and acceptance criteria.
- **6. Scale-up:** Expand assignments based on performance, capacity and client demand.

10 | Why Partner with Coral Swift?

- Access to a structured channel for international IT and Non-IT project discussions.
- A defined qualification framework for serious, established businesses.
- Opportunities to align specialized teams with multi-domain delivery requirements.
- Emphasis on governance, transparent scope, measurable quality and sustainable relationships.

11 | Partnership Enquiries

Seeking: Established IT companies, BPO operators, healthcare process teams, banking operations providers and qualified delivery partners.

Initial submission: Company registration proof; three-year operating history; employee-strength evidence; latest financial statements; service portfolio; infrastructure summary; two client references; authorized contact details.

Contact: Official Coral Swift email, website, registered address and authorized representative to be inserted after confirmation.

Next step: Request an eligibility review and a confidential introductory discussion.

Important disclosure: This document is a proposed business-development profile based on information supplied by the requesting party. It does not independently establish Coral Swift's incorporation, US location, existing tie-ups, past project assignments or present availability of projects. Confirm these details before circulating as an official corporate representation.
